# Eco-School Action Plan

Pupils need to take the lead in developing

the Action Plan

Date Action Plan was developed: September 2024

Action Plan developed by: Keyingham Primary School Eco-committee

Topic	Action	Target/Measure	Timescale/ Deadline	Who is responsible?	Evaluation of action/ Actual result achieved
<b>Maritime/Plastic Waste</b>	To reduced plastic waste in our oceans and to take part in the 'Maritime Oral Histories Project' to ensure that the maritime stories of the people of Hull are captured for future generations.	Maritime is an area our Eco-Committee are very interested in. They were able to link this with an assembly they planned and delivered to the rest of the school to educate the pupils of Keyingham Primary School about waste and plastics in our oceans. This is a project we are currently taking part in called 'SchoolCycled' whereby we are collecting plastic bottle tops with the aim to have them re-cycled into a piece of furniture for our school.	The Maritime project was held over a 4 month period.  Our 'SchoolCycled' re-cycling project is ongoing and monitoring throughout the year. A review will be held at the end of the academic year with the hope of sending off our bottle tops to be re-cycled.	Eco-Committee	Eco-Committee's questions were submitted to the 'Oral Maritime Histories Project' in Hull resulting in their questions being asked to their Volunteers.  'SchoolCycled' plastic bottle tops project is tracked throughout the year with our Eco-committee's continuous enthusiasm to keep our pupils engaged and encourage them to keep saving bottle tops for this important cause.

<b>Healthy Living</b>	For all pupils to participate in our Healthy eating/food wastage project. This has been a project our Eco-committee have been at the lead of by meeting with the manager of our school catering company, ABM.	They were at the forefront of producing a new menu for our school with the help of the manager. Our Eco-Committee spoke to individual year groups and asked them what they would like to see on our new menu. They were able to do this with the focus being on healthy eating i.e. looking at what ingredients are allowed in our food and what percentage of sugar, carbohydrates, protein sources, fruits and vegetables are required for a balanced and nutritious diet. They also had the opportunity to discuss with Jamie about our school's food wastage and how he manages this. They learnt that our food wastage is minimal and Jamie was able to give them an insight as to how he manages our school waste.	Ongoing monitoring and adjustments throughout the year. A review will be carried out at the end of the academic year	Eco-Committee, Catering Company (ABM)	Tracking and liaising with our pupils as to whether they enjoy our school meals and encourage new ideas for food wastage and healthy eating dishes.
