

Measurement

Learning Objective:- I can use natural materials to measure length and height

Ordering sticks by length

You will need:-

Lots of sticks of different lengths

When you have gathered your sticks, pick out 2 sticks which are a different size to each other. To make sure the comparison is fair, start by measuring the ends from the same point by placing the ends on the ground.

Questions:-

Which stick is shorter?

Which stick is longer?

How can you check to make sure?

Now, put them in order from shortest to longest and then longest to shortest.

Now, try the same activity again but using more sticks.

Have fun!

We look forward to seeing photographs of your activity
