

Symmetry BUGS

Something is symmetrical when it is the same on both sides. A shape has symmetry if a central dividing line (a mirror line) can be drawn on it, to show that both sides of the shape are exactly the same.

You will need:-

Sticks
Stones
Leaves
Shells
(any other natural resources you can find)

Activity 1

Make a pattern using natural materials with one vertical line of symmetry. When you have done this try making a pattern using two lines of symmetry.

You could draw a line or use a stick to show the line of symmetry.

Activity 2

Plan and create an animal with one line of symmetry using the natural resources you can find. You could make a butterfly, bird, spider or an animal's face.

Have fun!

We look forward to seeing photographs of your activity.
